

# Bayou Texar

Let's clean up our act before the scene is over!

Listed Below Are Some Ways To Prevent Pollution

- ◆ **YOU** can prevent storm water runoff by bagging up yard debris and being careful with what fertilizers you use, because it will all go into the bayou next time it rains
- ◆ If you live by the water **DO NOT** pull out sea grass, they keep the bayou clean by filtering out the dirt and keep the fish alive
- ◆ **DO NOT** dump toxins, such as motor oil, into the ground, they will eventually make their way to the Bayou.
- ◆ **Write** letters to your councilmen about all the septic tanks pumping sewage into Bayou Texar
- ◆ For general help to the environment, Recycle and don't Litter!

Contact local government to see how you can help even more!
